PROJECTS

OpenUp | [LINK](#) | [CODE](#)

- A mental wellness community web app that provides an anonymous space for users to unburden their hearts and minds.
- This platform fosters a supportive community, believing each shared thought is a step towards healing.
- TechStack Used: React.js, Node.js, Express.js, MongoDB, JWT Authentication

GetMeACoffee | [CODE](#)

- A web application that enables creators to receive support from their fans through donations.
- Featuring secure user authentication with multiple providers, a responsive user interface, and secure payment processing.
- TechStack Used: Next.js, Tailwind CSS, MongoDB

Car Management Application | [LINK](#) | [CODE](#)

- A full-stack web application that enables users to manage a list of cars.
- It includes features such as user authentication with JWT, car management (add, edit, delete), car search by title, description, tags, and also supports image uploads for cars.
- TechStack Used: React.js, Node.js, Express.js, MongoDB, JWT, Multer

ShortLinks | [LINK](#) | [CODE](#)

- Developed a full-stack web application to convert long URLs into customizable short links.
- The app features a clean, responsive UI and efficient backend for link management.
- TechStack Used: Next.js, Tailwind CSS, MongoDB

Automatic License Plate Detection | [LINK](#) | [CODE](#)

- Developed and deployed a real-time license plate detection system using the YOLOv8 model.
- Trained the model on a custom dataset and built a user-friendly web application with Streamlit, allowing users to upload images and videos for license plate detection.
- TechStack Used: Python, PyTorch, YOLO, Object Detection, Computer Vision

EXTRACURRICULAR

- **Volunteer Experience:** Google Developer Group NIT Jamshedpur - Social Media Team Head(2024-25).
- **Leadership Experience:** Successfully led a dance group to victory at a college fest(2019).
- **Personal Interests:** Dance, Sports, Fashion.
